

Santa Margarita
Water District

SEWER UPGRADE Project

SMWD.com/SJCsewer

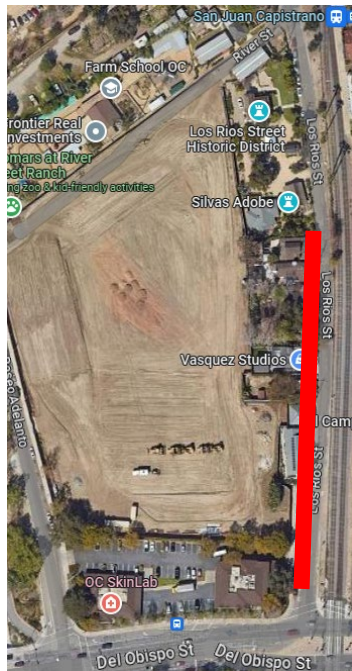

Santa Margarita Water District continues to upgrade critical wastewater infrastructure throughout San Juan Capistrano.

SMWD is upgrading 500 feet of sewer pipeline on Los Rios Street from June 5 through June 18. The work will take place Monday through Friday from 7:30 AM to 4:30 PM.

Residences, businesses, and visitors can expect traffic delays. **Los Rios Street will be closed to through traffic from Del Obispo to 31871 Los Rios (just before River Street);** in accordance with the City approved traffic control plan. The map to the right shows the closure area in red. Access to points north on Los Rios Street will be via Paseo Adelanto and Ramos Street.

There will be a 4-hour interruption in sewer service to reconnect the new pipelines. You will receive a door hanger notice 48 hours before the interruption. Not all customers receiving this notice will be impacted by the interruption.

We appreciate your patience as we work to ensure the reliability of our system.
